Positions Held

Academic/Research

2013–present **Research Assistant**, *Simulation-Based Engineering Lab*, Madison, WI.

- Investigate and implement parallel programming techniques and technologies to develop a distributed memory fluid-solid interaction engine.
- Developed the full-stack of a web app that records and displays the performance and testing metrics of *Chrono*.
- Developed web-based and scripting programs for pre and post processing tasks such as: model setup and rendering.

2015–present **Research Assistant**, *Wisconsin ADRC Imaging Group*, Madison, WI.

- Developed RapidPT, an open-source MATLAB toolbox for fast and efficient permutation testing with state of the art performance. The permutation testing procedure is accelerated through low-rank matrix completion methods.

Industry

Summer 2016 **SW Performance Intern**, *Cray Inc*, St Paul, MN.

Summer 2014 **Explorer Intern**, *Microsoft Corporation*, Seattle, WA.

- Performed the overall development of the UX that allows Maps app users to interact with the available layers. The UX addressed desktop, phone and tablet.

Previous Positions
