Positions Held

Academic/Research

2013–present **Research Assistant**, *Simulation-Based Engineering Lab*, Madison, WI.

Collaborated with Prof. Dan Negrut and Dr. Arman Pazouki in the study of parallel programming techniques and technologies for GPU, shared and distributed memory architectures, and their application to fluid-solid interaction problems. Other duties included developing web-based and scripting programs for pre and post processing tasks.

2015–present **Research Assistant**, *Wisconsin ADRC Imaging Group*, Madison, WI.

Worked with Prof. Vikas Singh and Vamsi Ithapu on improving the scalability, validating, benchmarking, extending, and open-sourcing a novel permutation testing algorithm.

Industry

Summer 2014 **Explorer Intern**, *Microsoft Corporation*, Seattle, WA.

Performed the overall development of the UX that allows Maps app users to interact with the available layers. The UX addressed desktop, phone and tablet.

Previous Positions
